

EDGARD MENJIVAR

19410 SANDY WOODS DR, TOMBALL, TX 77375-1793

Email: geomenjivar@yahoo.com

Objective

Skilled and safety-conscious Electrician Valve Technician seeking an entry-level position to apply my knowledge of electrical systems and wiring and Valves to ensure the efficient and reliable operation of electrical equipment and systems in a dynamic organization.

Ability Summary

- Reading and analyzing blueprints and schematics.
- Diagnosing electrical system malfunctions and failures.
- Performing electrical risk assessments.
- Assessing electrical processes and procedures.
- Pursuing knowledge and training on evolving practices or technology.
- Troubleshooting.
- Critical thinking skills.

Employment History

04/2018 - 10/2023 **E-tech/ Valve**

NRG Manufacturing, Tomball, TX

E-tech/ valve NRG Manufacturing - Tomball, TX April 2018 to Present build panel boxes and console boxes assemble light kits and skids, run electrical harness throughout the unit. Use schematics for wiring the panels and the butterfly valves on the manifold and isolation valves in the trailers, label cables. Build cable kits, use hand tools, electrical tools, nematic and hydraulic tools.test the console box on trailer Use multi meter to check and trouble shoot if anything is not to it standards. Use of overhead cranes and forklifts to move materials to the unit.

03/2016 - 04/2018 **Valve Technician**

Gulf Coast Modifications, Houston, TX

Valve Technician Gulf Coast Modifications - Houston, TX March 2016 to April 2018 Assembly technician Build Gate Valves, Angle valves, Ball valves, Butterfly valves, isolation valves, chokes and manifolds. Read schematics, blueprints.and any other engineering drawings Tear down refurbished valves and deep clean them with chemicals. Sand blast valves and assemble them for conformance to standard and customers requirements. Use of jib cranes or overhead cranes to move valves. Pack the valves, use hand tools, nematic tools, and electrical tools. Test valves and send them to paint. Stamp the API number, and send to shipping and receiving. Use of forklift to move product to its destination.

05/2003 - 03/2016 **Mechanical Assembler**

BAKER HUGHES, Tomball, TX

Mechanical Assembler BAKER HUGHES - Tomball, TX May 2003 to March 2016 BUILD FRACS AND SKIDS USE AIR TOOLS TO DRILL AND CUT & GRIND RUN HYDRALILIC HOSES CABLES WIRES ALONG THE FRACS AND SKIDS ASSEMBLE IN CONFINE SPACES TEST THE UNIT IN HIGH PRESSURE CHECK FOR LEAKS AND MAKE SURE EVERYTHING IS TIGHT DRIVE FORKLIFT AND OPERATE CRANES

01/1998 - 05/2003 **Assembly Technician**

, Houston, TX

Assembly Technician NOV - Houston, TX January 1998 to May 2003 Assemble valves, break them down. Modify to it's specifications. Rebuild them and test them out. Use tools and air tools to tighten bolts and nuts. Use over head cranes to pick them up and forklifts to drop them off take to shipping label them and tag them once they are done.
